6 HACKS to build your BUSINESS

You, your products and your customer

Hack 4

What are your products?
Remember you have two sets of products, namely:
• The Annique Roobos range of skin and healthcare products
• The Annique Roobos Business Opportunity

This section covers the selling and marketing of your Annique Roobos products and the Annique Roobos ABC Success Plan.

Firstly Know your products
And the best way to know your products is to use your products

Annique Roobos's skin care products have various unique benefits, and the only effective way of getting to know your products better is to test them yourself and use them daily. Once the benefits of Annique Roobos' products have genuinely fired up your enthusiasm, you may share them with your friends and family. It is essential to feel relaxed about discussing the products, and who is easier to practice on than those nearest to you?

Share an anecdote
Discover a success story about each of your favourite products so you can share it with others. The more customers and consultants you have, the more success stories you will collect on each of your products and the Annique Roobos Business Opportunity or the Annique Roobos Business and what it has meant to other people. Success stories breathe credibility on you and your products. They may highlight different and exciting properties of the products that do not necessarily appear in the Annique Roobos product catalogue. Locations in the Success Guide. You can find amazing success stories on the Academy on the site.

Share the products
This is the promotional power of word of mouth – the sum and substance of any business. People rarely do it. They tell others about good restaurants, firms, etc. Share your Annique Roobos products with others in the same way. Word of mouth promotion is the fundamental characteristic of Multi-Level Marketing. "Share your knowledge and experience of the products with other people. Do not over sell it to them!"

When you delivered the Annique Roobos products, you had already had the chance to explain the products in detail to the customer. Therefore, at this stage, keep it brief!

For example – point out the Revitalising Cream and say:
"The Forever Young Revitalising Cream contains rejuvenating ingredients and Roobos extract helps to stimulate collagen production in the cells. It has been dermatologically tested and found safe for sensitive skin types."

Keep it short and to the point.

Our part in working towards a greener environment

GOING GREEN

Our Skin Care jars are Plastic Neutral!

What is plastic neutral?
For every kilogram of plastic Annique's supplier converts into packaging, an equal amount of post-consumer plastic waste (PCPW) is collected from the environment and recycled.

Did you know?
We have gone plastic-neutral to look after the environment and leave the world a better place!

This includes the following skincare jars:

- Forever Young
- Lucid
- Revitalising Cream

In an effort to reduce our carbon footprint, we have introduced new Forever Young and Lucid jars. They still look the same but contain 22.5% less plastic than before. Additionally, we have converted our Hydrafine and Sensitive jars into tubes, further contributing to a better environment.

Price Increase

Please Remember:

Annique Rooibos prides itself on offering you premium Rooibos-based products of the highest quality. While this is costly and takes time and effort, we never

want to compromise on our high standards.

This serves as official notification of our price increase of **12% on average from 1 May 2024**, and thereafter again yearly in May. This change is better aligned with our major supplier's yearly price increase cycle.

Some factors beyond our control, like the wars in Europe and the Middle East, the South African Ports challenges and rising fuel costs has brought uncertainty and increases regarding raw materials for packaging and formulations, that have put some of our suppliers under severe pressure. Local suppliers base their pricing on import parity calculations and some of the most important factors driving raw material increases are crude oil and the exchange rate. Despite this we have been in fierce negotiations with our key suppliers in an effort to keep prices in check.

We know that we still have the most effective, value for money health and beauty products on the market, and trust that you will join us in making a difference in the lives of everyone who needs and uses our products.

Thank you for your continued loyalty and support.
