

The Key to Healthy Ageing: NAD REVEALED

Introducing a World First: NAD and Rooibos. Ever wished you could feel younger or slow down the ageing process? Scientists may have found a way for healthier ageing through an extraordinary coenzyme called Nicotinamide Adenine Dinucleotide or NAD.

NAD 30 Capsules

What is NAD?

An essential coenzyme found in every living cell.

- It ensures effective cell function
- Crucial for reactions that keep cells alive
- Plays a vital role in energy metabolism and maintaining proper cell functioning, especially in mitochondria, the cell's power plants

Why is NAD so important?

Cellular health depends on NAD. It's crucial for brain, blood and muscle health, as well as many cellular functions, contributing to greater longevity.

DID YOU KNOW?

NAD declines dramatically after 40! So, supplementation is key.

BENEFITS:

Supports the maintenance of healthy DNA

Helps support your body clock, ensuring sleep/wake and hunger cycles are synchronized

Assists with metabolic health

Helps protect the brain

Supports heart health

Green Rooibos provides potent antioxidants and anti-ageing benefits.

Our bodies produce NAD, but ageing and stress causes the NAD levels to decline. Lower levels of NAD are also associated health challenges like:

- Cellular ageing
- Metabolic dysfunctions
- Chronic diseases like diabetes and cardiovascular disease and
- Neurodegenerative diseases like Alzheimer's and Parkinson's

This product is not intended to diagnose, treat, cure, or prevent any disease. Health supplements are intended to complement health and supplement diet.
